

Doing the Task

- 1.) Once the play button in the corner (described in setting up the prototype), is pressed, you are brought to the home page:

- 2.) You can click on start, which will bring you straight to the survey page, or the tutorial which gives you insight as to what to expect for the prototype:
 - a.) If you click on the arrow in the bottom right that also brings you to survey
 - b.) The home button reloads the home page

The tutorial page looks like this:

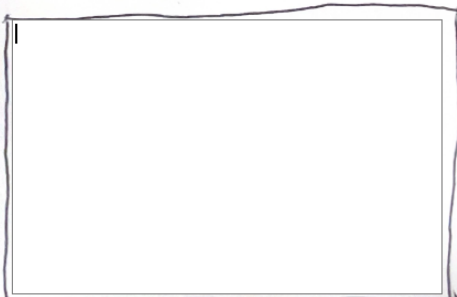

3.) Here is a description of the tutorial (see above picture)

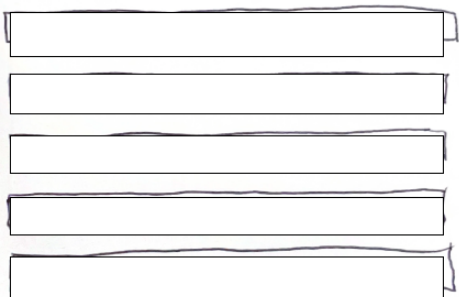

- a.) Survey, Question, and Read pages will have the reading on one side, a description of whichever part the user is on, and text inputs. The text inputs depend on the part you are in.
 - i.) In the read section, you can't see your questions, however if you press the back arrow, you will be able to go back to read your questions if you need to review them to answer them in the read section.
- b.) Recite and Review look a bit different.
 - i.) Recite does not have the reading attached to it, instead it has the questions that the user wrote from the question page, and then in the main part has the instructions for recite. This page has a description of the read part of SQ3R.
 - ii.) Review has your questions and any notes you typed in both survey and read. This page also has a description of the review part of SQ3R.
- c.) The go back to part has 5 buttons that bring you back to the step you were on in the SQ3R tutorial. They are in order of the acronym therefore it goes:
 - i.) S = survey
 - ii.) Q = question
 - iii.) R = read
 - iv.) R = recite
 - v.) R = review
 - vi.) SQRRR = survey, question, read, recite, review

d.) Text Entry Fields (the places the user can type in) look like this:

Notes

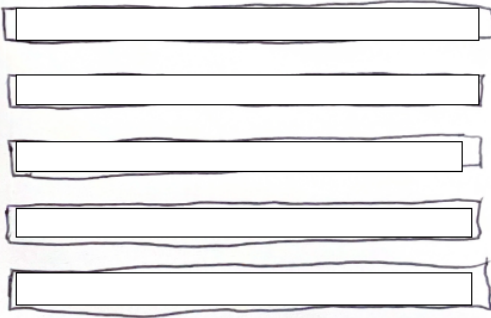

Notes (question boxes)

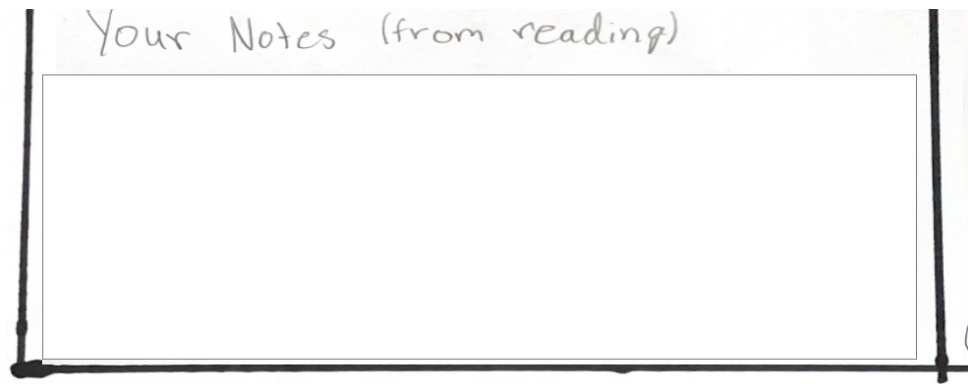

Your Answers (in your own words)

Notes (question boxes)

e.) Here is the list of buttons and what they do:

i.) Home = brings you back to the home page

Looks like:

ii.) Next = brings you directly to the next page

Looks like:

iii.) Back = brings you to the previous page

Looks like:

iv.) Help = brings you to the tutorial

Looks like:

- v.) Start = brings you directly to the Survey page (skips the tutorial)
Looks like:

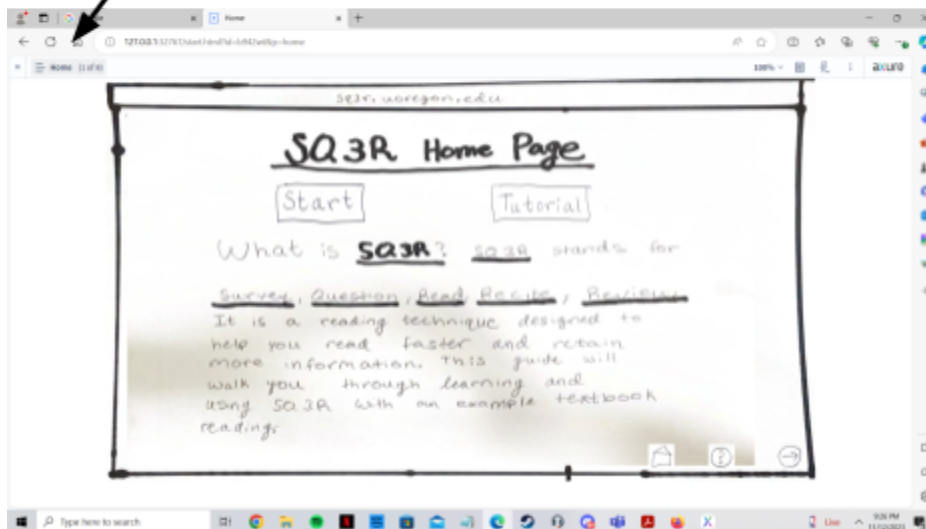

- vi.) Tutorial = brings you to the tutorial page
Looks like:

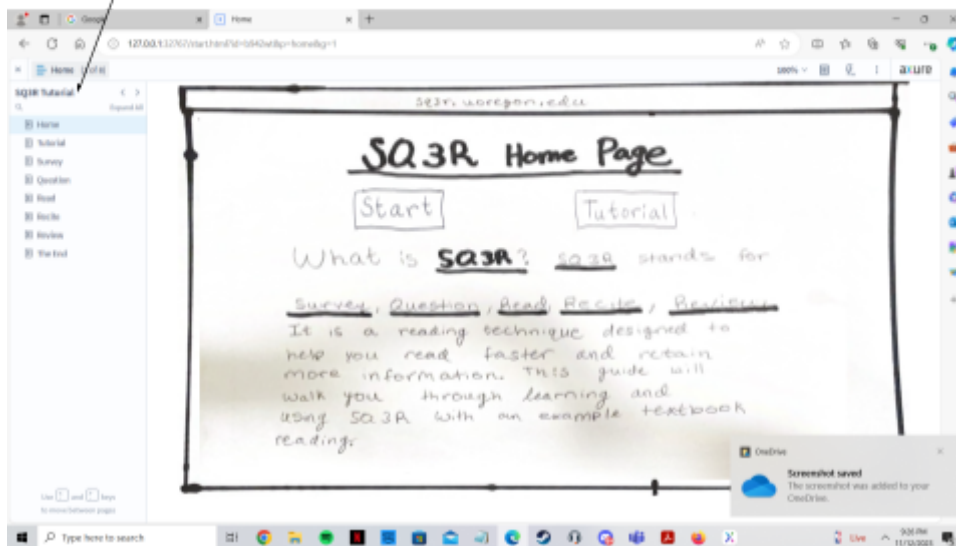

- 4.) There is a hamburger style menu where you can also jump from page to page. If you do not click on one of the 4 buttons, but you use the hamburger menu, the text will not save. If you click on one of the 4 buttons, then you use the hamburger menu icon, the text will save. Saving text is explained more in running the prototype. To save the text though, make sure to use one of the 4 buttons: back, next, home, or help.

Click Here!

Prototype Pages

- 5.) You are almost ready to start using the prototype. Those are the instructions for using the prototype itself. Make sure you have read about how to set up and run the prototype!
- If you have not read the second document: read the running the prototype document
 - If you have read the second document:

- i.) Here is a brief overview of SQ3R. The tutorial prototype will give more of an in depth overview and have you interact with each step.
 - (1) SQ3R stands for survey, question, read, recite, review
 - (a) Survey: scan the reading for headings
 - (b) Question: generate questions after surveying (after searching for headings)
 - (c) Read: read to find answers to your questions
 - (d) Recite: answer your questions without looking at reading
 - (e) Review: review the correct answers and any questions you could not answer during the recite step
 - (2) It is used to help read and understand complex information better

6.) The last thing to know about the tutorial is that the tutorial already has a reading attached to it. You do not need to select any pdf or anything.

7.) You are now ready to use the prototype!

a.) IMPORTANT NOTES/NOTES TO REMEMBER

- i.) **BEFORE CLOSING THE BROWSER OR RELOADING THE PAGE, PLEASE SCREENSHOT WHAT YOU TYPED IN EACH PAGE. PLEASE DO NOT CLOSE THE PROTOTYPE OR RELOAD THE PROTOTYPE.**

- (1) FOLLOW THE INSTRUCTIONS UNDER THE RUNNING THE PROTOTYPE DOCUMENT

- (a) THEY ARE LOCATED UNDERNEATH WHERE IT HAS INFORMATION ABOUT SAVING THE USER DATA

- (i) TITLED SECTION:

- 1. INSTRUCTIONS FOR SCREENSHOTTING + PUTTING INTO FOLDER

- ii.) Please actually follow the instructions for SQ3R and apply it to the reading. I understand the reading may be boring, however to have accurate user observation data, it would be helpful if you interacted with the system and typed questions or notes that help you learn and apply SQ3R

- iii.) Make sure to select the home page in Axure before pressing play
